The first two sessions were nothing to be concerned about, and they were about as easy as they came. They thought they had a good idea of what the team would look like during the season, and with a fair degree of confidence that the team would play fairly consistently as a whole, just as they had the previous year. Those assumptions were wrong. In just four practices, the defense has shown a greater dynamic range than they have shown all preseason. It has shown a level of play that is a bit unsettling. Not only have the secondary and the defensive line shown an ability to compete at an even level, but the linebackers have shown great athleticism in several situations. If the two outside linebackers can continue to play well, the defense could be as good as they thought it was going to be. It will be a nice boost to the confidence of the players and the coaches. However, if the linebacker play falls apart, the defense could be in a lot of trouble. It is up to the players to give the coaches the confidence that they can perform well enough to keep them as starters for the regular season. The coaches have done an admirable job of praising the players and giving them the best instruction possible, but it is up to the players to back it up. If the players are confident

AAMI has unveiled AutoCAD 2023, an upcoming version of the industry-leading CAD software widely used by architects, engineers, and other professionals. AAMI is planning a public release for mid-May 2019, along with the usual beta tests with registered users. Here's a first look at new features coming to AutoCAD: Markup Import and Markup Assist Now you can import your own annotations and feedback from printed paper or PDFs. With Rapid Import you can import feedback from your own files, such as images of printed pages, or from PDFs and other files. The new tool supports multiple annotations and makes it simple to send changes back and forth between annotators and AutoCAD users. Whether you're at a design review, collaborating with others or documenting your own work, you can now send annotations and other feedback to AutoCAD from printed paper or PDFs. In addition, the new markup tools save you time and help you produce even better drawings. Rapidly send and incorporate feedback into your designs. Import feedback from printed paper or PDFs and add changes to your drawings automatically, without additional drawing steps. With the Markup Import tool, you can import from all three file types and send feedback from text, images and symbols, including line styles, labels, and dimension styles. When you start a new drawing, you can view and
